# MARKET ANALYSIS

- Quantifying the number of individuals who identify as White Nationalist or hold White Nationalist sentiments is challenging due to the secretive nature of the groups, the varying definitions of what constitutes a White Nationalist, and the difficulty in tracking online activity.
- White Nationalism is on the rise given the increase in the cultural erasure, disenfranchisement, and the silencing of White or Aryan people worldwide. These figures are projected to grow exponentially through 2030 as anti-white racism and immigration continues to grow.

Data synthesized by AI based on available insights from reputable sources, focusing on trends in online activity, and provide approximate figures or indicators where possible, while acknowledging gaps and limitations in the data.

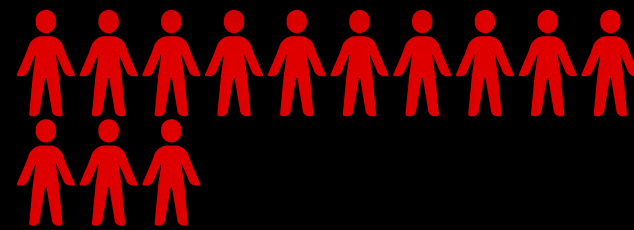

Worldwide Figures exclude The U.S. & Europe
